

Stonewall

Stonewall, Sept. 10. We are all very sorry to hear that Mr. Bert Stratton is sick at his home near here. We hope for him a speedy recovery.

Mrs. Dick Thomas and small son, Pete, of Memphis, Tenn., have returned home after spending the summer here with her parents, Mr. and Mrs. C. M. Stratton.

Glenn Drinkard and Clayton Drinkard, Jr., of Lynchburg, spent Sunday with Mr. and Mrs. C. T. Drinkard and family.

Miss Edna Adcock spent the weekend with her mother, Mrs. Adcock, of Madison Heights.

Mr. and Mrs. Iby Wheeler and daughters, Betsy and Bertha, Mrs. Ann Lee and Mrs. Lee Wheeler spent Sunday in Lynchburg with Mr. and Mrs. Lawrence Wheeler.

Mr. and Mrs. Parks Jennings and Mrs. Jennings, Mrs. B.A. Christian to Richmond Sunday to spend the winter at her home there. She has been with them all the summer. Their son, Thomas also went to Richmond, to attend college here this winter.

Mr. and Mrs. J. H. Beard had as their dinner guests Sunday Mr. Drinkard, Mr. and Mrs. Clayton Lawrence, Mrs. Lewis Martin and daughter, Dot, and Mr. Robert Beard and Herman Beard.

Mr. and Mrs. Wallace Fontenot had as their dinner guests on last Sunday Mr. and Mrs. Jennie Davidson and children, Jessie Davidson, and Mr. and Mrs. C. L. Carson.

Misses Anne Carson, Mary Frances Jennings and Mr. and Mrs. Pete Dickerson were dinner guests of Mr. and Mrs. C. M. Caldwell on last Sunday.

Mr. and Mrs. E. L. Chick had as their guests Sunday afternoon and night, her mother, Mrs. W. H. Drinkard, Mr. and Mrs. Clayton Drinkard and sons, Tye and Wade; Mr. and Mrs. Henry Beard and son, Lawrence, and Mr. and Mrs. Lester Carson.

Miss Lee Carter expects to return to her home here today from a visit with her father, Thornhill Carter, of Washington.

Mrs. Cassie Brown, of Lynchburg spent the weekend with her home folks here.

Mr. and Mrs. O. R. Turnes visited their daughters at Gladstone over the weekend.

Miss Annie Alvis expects to return to her school in Kentucky this week, after spending her vacation with her parents, Mr. and Mrs. J. P. Alvis, Sr.

Pasturing of Turkeys Saves in Grain Feeds

Not only will the pasturing of turkeys and poultry, if properly con-

ducted, result in soil conservation, but considerable saving in grain will result.

Orchard grass and ladino clover has been proven an effective pasture for range turkeys and chickens. Tests at national laboratory, Pennsylvania, have shown that the number of birds to be pastured can be doubled by proper stand and management.

So will the cost of steel items needed for housing — such as nails and window screens.

This official, who withheld use of his name, said the new steel increases will not jump the industry's receipts beyond the average \$5 a ton advance granted last February at the end of the steel strike.

That increase set off a chain of price rises for automobiles and scores of other consumer products requiring large amounts of carbon steel. Because they receive comparatively little alloy steel the effect of the new increase on prices of finished goods probably will be slight, OPA officials believe.

As for shoes, tanners have been pressing for weeks for a leather price increase and OPA reportedly is ready to grant one for some types. Shoe producers have joined in the appeal, claiming they are unable to obtain enough leather. And they have made clear they want higher shoe prices to offset any increase for leather.

OPA officials see little likelihood shoe manufacturers and dealers could be asked to absorb any new production cost increases. This means shoe prices probably would rise.

OPA officials see little likelihood shoe manufacturers and dealers could be asked to absorb any new production cost increases. This means shoe prices probably would rise.

Shows 'How Not to Fly,' Then Crashes

KANSAS CITY, Kan. — Demonstrating "how not to fly" as part of an air show, Leonard O. Sherman, 36, spun 20 feet in his death as his wife and three of their five children looked on. Sherman was showing the dangers of stalling tactics at low altitudes, and failed to pull his light plane out of the spin.

Legs Mashed, He Directs Rescue

Rare Fortitude and Presence Of Mind Displayed

MALDEN, MASS. — George Ross, 46, a stationary engineer, with rare fortitude and presence of mind, directed his own rescue from a conveyor belt in which his legs were jammed after stepping the electric system by throwing small tin cans at a "stop and go switch."

It was feared amputation of both legs would be necessary, however. Police were summoned to the Ross' Drug and Chemical company plant by a neighbor who heard Ross' cries for help. When officers arrived they had to climb a high fence and force a door into the plant.

They found Ross in the conveyor room, bleeding badly. His legs were tangled and twisted between two steel conveyor systems which had been running in opposite directions. Ross warned officers against bumping into the machinery and instructions on how to do it.

There were 12 men working under Ross' calmly-given instructions. When he was finally extricated, by means of a crane, he said, "Call my wife, Laura, and tell her to meet me at the hospital."

Then he collapsed. He recovered enough, as he was being loaded into the ambulance, to tell his rescuers, "Be sure and get hold of someone to get steam up at the plant this morning."

He recovered enough, as he was being loaded into the ambulance, to tell his rescuers, "Be sure and get hold of someone to get steam up at the plant this morning."

Electrical Drying Soft Corn Practical

Ohio Farmer Develops Own Economical System

The problem of drying soft corn is not the difficult chore it once was, according to farmers who have experimented successfully with fan-generated, forced air systems installed in their own cribs.

Heat is not an essential factor in most installations, particularly when drying operations are conducted in the fall or early spring. The danger in cribbing immature corn is that it may spoil before cold weather arrives to restrain spoilage processes during the winter, or mold during the next few warm spring days.

Forced air drying is practical and economical without heat in temperatures as low as 30 degrees. Heat up and cut costs of drying operations. Karl Mohr, Ohio farmer, for several years has used a fan system for electricity to crib-dry 60 tons of immature corn by forcing air through a 100 cubic foot tunnel during a period when daytime temperature reached 80 degrees.

He found Ross in the conveyor room, bleeding badly. His legs were tangled and twisted between two steel conveyor systems which had been running in opposite directions. Ross warned officers against bumping into the machinery and instructions on how to do it.

There were 12 men working under Ross' calmly-given instructions. When he was finally extricated, by means of a crane, he said, "Call my wife, Laura, and tell her to meet me at the hospital."

Then he collapsed. He recovered enough, as he was being loaded into the ambulance, to tell his rescuers, "Be sure and get hold of someone to get steam up at the plant this morning."
